PORTA (period times 10-15 lines deep)
This periodic uses only 13 alphabets. The first half (A-M) is reciprocal with the second half. The position of the second half is determined by a key designation ( $A, B$ or $C, D$, etc.). The keys are used in the keyword which also determines the period. In the $A, B$ alphabet, pt $a=C T N, p t b=C T O, p t n=C T A, p t o=C T B$, etc. In the C, D alphabet, pt a = CT O, pt o = CT A, etc.
