

Young Tyros Newsletter August 2020

Editor-LIONEL - cryptolion@aol.com

Staff - APEX DX ARDUINNA MSCREP PARROT

APEX DX Cryptography Insight

Looks like a lot of Mumbo/Jumbo to me.

APEX DX

Our ACA lost one of its all time treasures this past month with the death of APEX DX, Educator, Cryptologist, Numismatist, Chronicler of Nature and a member of our Young Tyros Staff. He passed away last month at the age of 89. He instilled a sense of wonder in bright young people about the beauty of numbers and cryptograms. He has hosted two of our ACA Conventions in Montreal and introduced two new cryptic forms to our ACA through the Cm, *The Polyomino Pieces* in our MA and SO 1998 issues and the *Literal Sudoku* in 1996 issues. He received our ACA Cherry Blossom Award for his outstanding contributions to our ACA and the world of cryptology in 2012. His difficult Cryptarithm constructions continue to appear regularly in our Cryptarithm Column Specials as will his endless contributions to our Young Tyros Newsletters. His challenging cipher experience with a Physical Science Class appears on page three. We miss him so.

Young Tyro Newsletters

In addition to this Senior Young Tyros Newsletters, we have two additional Newsletters published bimonthly for primary and secondary school students. If you would like a family or friend youngster to receive one of these, please send us their name and E-Mail address.

The Tyro Tutorial

Available at our ACA web site under Resources. It describes the solution process to some thirty different cipher types and includes an appendix with a Railfence Template, Polyomino Congruent Squares by APEX DX, a comprehensive listing of Null variables by BION, an Algorithm process description, Foursquare Cipher digraph frequencies by RISHU, use of Google as a solving tool and the use of cryptology to bridge generation communication gaps while increasing a youngster's mathematical interest. Please direct any questions to LIONEL.

Free Code and Cipher Books – Place an order. The mailing is also free.

American Magic - Levin Bacon Bi-literal Cypher - Gallup Codes and Ciphers - Wrixon Hitler's Spies - Kahn Invitation to Cryptograms - Williams Kahn on Codes - Kahn Mysterious Messages - Blackwood - Secret Codes & Ciphers - Kohn Seizing the Enigma - Kahn Unbreakable Code - Bertman

APEX DX cipher, "One Man's Philosophy"

K GJX EBJM K GJX JQL MBJM'H JVVK GJX. *CZCTGT

Posted on the chalk board of a Physical Science Club for an after-class Mathematics Club, meeting later that afternoon. APEX DX had been exploring the statistics of letter distribution in newspapers and other prose sources with his Mathematics Club and relates: "That afternoon in my Physical Science class an astute young woman student had experienced a "Eureka moment," calling out joyously and correctly identifying its solution. The joke had to be on me. You don't pose an unkeyed, overly brief (33 letters) substitution cipher as necessarily solvable, though this one had been just that. I asked if the MBJM'H had been the elegant giveaway but she replied that the CZCTGT had been her solution route."

Sunny Ciphering, LIONEL
