

Young Tyros Newsletter October 2020

Editor-LIONEL - cryptolion@aol.com

SO E-5 Baconian. APEX DX mischievousness lives on.

RISHU – Richly Innovative Solving Help Utility

APEX DX Memorial Hyperlink

https://mountroyalcem.permavita.com/site/HaroldDonAllen.html

Note from his children:" Of course, it would be an honour that you continue to recognise Dad's earlier work – let that mischievousness live on!"

Xenocrypts RISHU

If you have never attempted solving a Xenocrypt for fear of not knowing the language, you are performing a huge disservice to yourself. Many of the Xenos on the first page of the column are a lot easier than the Aristocrat and Patristocrat ciphers that cause us so much pain. Cribs are available for placements which allow Keyword Alphabet construction leading to additional plaintext. Necessary tools are at a minimum. Bi-lingual proficiency is not among them. Although a foreign pocket dictionary is helpful, it is not required. Notice that all of the Xenocrypts on the first page of the column are constructed with a K1 or K2 keyword alphabets. Keyword Alphabet analysis is a most helpful asset to use when solving Aristocrat and Patristocrat and Xenocrypt ciphers. Another helpful Xenocrypt tool is the *ACA Xenocrypt Handbook*. The *Xenocrypt Handbook* is an immeasurable aid as you begin to tackle the slightly more difficult Xenocrypt constructions, Edited and published by PHOENIX in 1996. The handbook is full of instructional material, foreign language word lists, frequency tables and statistical data.

Young Tyro Newsletters – Now available on our ACA Web Site. Send solutions to LIONEL

Young Tyros Newsletter now available for primary and secondary school students on ACA web site under Resources.

The Tyro Tutorial

Available at our ACA web site under Resources. It describes the solution process to some thirty different cipher types and includes a Railfence Template, Polyomino Congruent Squares by APEX DX, a comprehensive listing of Null variables by BION, Foursquare Cipher digraph frequencies by RISHU, and the use of Google as a solving tool.

Free Code and Cipher Books – Place an order. The mailing is also free.
