## Examples of Solving Cm Cons*

* "Cm Cons" means "cipher constructions in The Cryptogram" -- the bi-monthly publication for members of the American Cryptogram Association (ACA) -- www.cryptogram.org

## Examples of Solving

This series shows specific examples of solving ACA ciphers. It tries to give successive hints of what to look at, then follows through by using each hint, building to the solution.
Try to solve the cipher on your own, using as many hints as you need, or just read along.

Please report errors or send suggestions to nudge@cryptogram.org

## What is a Cryptarithm?

A cryptarithm is an arithmetic operation in which letters have been used to represent the digits. Use the rules of arithmetic to infer what digit each letter represents. Each cryptarithm has a unique solution.

Cryptarithms in Cm are written in a single line to conserve space.

## Getting started on a Cryptarithm

Start by rewriting the arithmetic in normal form. Then learn facts about the digits. E.g.,

- What represents zero, one, or nine?
- What cannot represent zero?
- What digit is greater than another?
- What set of digits can each letter represent?

## Solving C-2 from Sample Cm

C-2.Multiplication.(Two words, 9-0) VERMONSTER
SUNNY * DAY = ADOONY; + NAMTSY; + SRMRNY = SAOMRASY

What does the first line tell us?
Cipher ID: C-2
Type: Multiplication
Key: the letters will spell out two words when listed in order from 9 to 0 (9876543210)
Created by ACA member VERMONSTER

## Solving C-2 from Sample Cm

Rewrite the cryptarithm in traditional format, aligning digits correctly. Always a good first step.

SUNNY * DAY = ADOONY; + NAMTSY; + SRMRNY = SAOMRASY

| SUNNY |  |
| :---: | :---: |
| $\frac{\mathrm{XDAY}}{\text { ADOONY }}$ |  |
| $\frac{\text { NAMTSY }}{\text { SRMRNY }}$ |  |
| 9876543210 |  |
|  | $(2 \mathrm{wds})$ |

## Solving C-2 from Sample Cm

Rewrite the cryptarithm in traditional format, aligning digits correctly. Always a good first step.

SUNNY * DAY = ADOONY; + NAMTSY; + SRMRNY = SAOMRASY

| SUNNY |  |
| :---: | :---: |
| $\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$ |  |
| $\frac{\text { NAMTSY }}{\text { SRMRNY }}$ |  |
| 9876543210 |  |
|  | $(2 \mathrm{wds})$ |

We are multiplying by a three-digit number and we have three partial products. Therefore, all digits of the multiplier (DAY) are nonzero, and everything lines up nicely.

## Solving C-2 from Sample Cm

Y times SUNNY gives a partial product that ends with $Y$. What can we say about $Y$ ?

| SUNNY |  |
| :---: | :---: |
| $\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$ |  |
| $\frac{\text { SAMTSY }}{\text { SARNY }}$ |  |
| 9876543210 |  |
|  | $(2 \mathrm{wds})$ |

## Solving C-2 from Sample Cm

Y times SUNNY gives a partial product that ends with $Y$. Digits that behave like $Y$ are: $(0,1,5,6)$

| SUNNY |  |
| :---: | :---: |
| $\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$ |  |
| $\frac{\text { SAMTSY }}{\text { SRMRNY }}$ |  |
| 9876543210 |  |
|  | $(2 \mathrm{wds})$ |

## Solving C-2 from Sample Cm

Y times SUNNY gives a partial product that ends with $Y$. Possible digits for $Y$ : $(0,1,5,6)$
Y has a six digit partial product. Y cannot be zero.

| SUNNY |  |
| :---: | :---: |
| $\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$ |  |
| $\frac{\text { SAMTSY }}{\text { SRMRNY }}$ |  |
| 9876543210 |  |
|  | $(2 \mathrm{wds})$ |

## Solving C-2 from Sample Cm

Y times SUNNY gives a partial product that ends with $Y$.
Possible digits for $Y$ : $(1,5,6)$
$Y$ has a partial product that is not SUNNY. $Y$ cannot be one.

| SUNNY |  |
| :---: | :---: |
| $\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$ |  |
| $\frac{\text { SAMTSY }}{\text { SARNY }}$ |  |
| 9876543210 |  |
|  | $(2 \mathrm{wds})$ |

## Solving C-2 from Sample Cm

Y times SUNNY gives a partial product that ends with $Y$. Possible digits for $Y$ : $(5,6)$
SUNNY times D, A, and $Y$ all end in $Y$. Only 6*1 and 6*6 end in 6, so can't satisfy three different values ending in 6 . Y cannot be 6 .

| SUNNY |  |
| :---: | :---: |
| $\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$ |  |
| $\frac{\text { SRMMTSY }}{\text { SAOMRASY }}$ |  |
| 9876543210 |  |
|  | $(2 \mathrm{wds})$ |

## Solving C-2 from Sample Cm

Y times SUNNY gives a partial product that ends with $Y$. Possible digits for $Y$ : (5)
Y must be 5. SUNNY times D, A, and $Y$ all end in Y. Any odd number times 5 ends in 5, so that'll work, too. Record $Y=5$. Remember also that D and A must be odd.
SUNNY
$\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$
NAMTSY
$\frac{\text { SRMRNY }}{\text { SAOMRASY }}$
9876543210
Y
$(2 \mathrm{wds})$
$D$ is one of $(3,7,9)$. $A$ is one of $(3,7,9)$.

## Solving C-2 from Sample Cm

All of the partial products have six digits. The one starting with S must be larger than the rest - it is closer to 10 * SUNNY. So $D>A, D>Y$. $D$ is one of $(7,9)$. Also, $S>N, S>A$.

| SUNNY |  |
| :---: | :---: |
| $\frac{\mathrm{X} \text { DAY }}{\text { ADOONY }}$ |  |
| NAMTSY |  |
| $\frac{\text { SRMRNY }}{\text { SAOMRASY }}$ |  |
| 9876543210 | $(2 \mathrm{wds})$ |
| Y |  |

$D$ is one of $(7,9) . \quad D>A . A$ is one of $(3,7)$.

## Solving C-2 from Sample Cm

Y times SUNNY ends with NY; D times SUNNY ends with NY. We can tabulate the products of a range of NNY times 5, 7, and 9. See which *7 or *9 products have the same right two digits as the corresponding ${ }^{*} 5$ entry. Can omit $\mathrm{N}=0,5$.

| SUNNY |  |
| :---: | :---: |
| $\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$ |  |
| NAMTSY |  |
| $\frac{\text { SRMRNY }}{\text { SAOMRASY }}$ |  |
| 9876543210 | $(2 \mathrm{wds})$ |
| $Y$ |  |

$D$ is one of $(7,9) . \quad D>A . A$ is one of $(3,7)$.

## Solving C-2 from Sample Cm

Y times SUNNY ends with NY; D times SUNNY ends with NY. We can tabulate the products of a range of NNY times 5, 7, and 9. See which *7 or *9 products have the same right two digits as the corresponding *5 entry. Can omit $\mathrm{N}=0,5$.

| SUNNY |  |
| :---: | :---: |
| $\frac{\mathrm{XDDAY}}{\text { ADOONY }}$ |  |
| $\frac{\text { NAMTSY }}{\text { SRMRNY }}$ |  |
| 9876543210 |  |
| SAOMRASY | $(2 \mathrm{wds})$ |

| $D$ is one of $(7,9) . D>A . A$ |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| N | NNY | * 5(Y) | * 7 | * 9 |
| 1 | 115 | 575 | 805 | 1035 |
| 2 | 225 | 1125 | 1575 | 2025 |
| 3 | 335 | 1675 | 2345 | 3015 |
| 4 | 445 | 2225 | 3115 | 4005 |
| 6 | 665 | 3325 | 4655 | 5985 |
| 7 | 775 | 3875 | 5425 | 6975 |
| 8 | 885 | 4425 | 6195 | 7965 |
| 9 | 995 | 4975 | 6965 | 8955 |

## Solving C-2 from Sample Cm

Y times SUNNY ends with NY; D times SUNNY ends with NY. In rows 225 \& $775(\mathrm{~N}=2, \mathrm{~N}=7)$ the last two digits of the $5 \& 9$ are the same. This identifies that $\mathrm{D}=9$ (record it ), N is one of $(2,7)$.

| SUNNY |
| :---: |
| $\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$ |
| NAMTSY |
| $\frac{\text { SRMRNY }}{\text { SAOMRASY }}$ |
| 9876543210 |
| D Y |
| (2 wds $)$ |

$N$ is one of $(2,7)$. $A$ is one of $(3,7)$.

| N | NNY | * 5(Y) | * 7 | * 9 |
| :---: | :---: | :---: | :---: | :---: |
| 1 | 115 | 575 | 805 | 1035 |
| 2 | 225 | 1125 | 1575 | 2025 |
| 3 | 335 | 1675 | 2345 | 3015 |
| 4 | 445 | 2225 | 3115 | 4005 |
| 6 | 665 | 3325 | 4655 | 5985 |
| 7 | 775 | 3875 | 5425 | 6975 |
| 8 | 885 | 4425 | 6195 | 7965 |
| 9 | 995 | 4975 | 6965 | 8955 |

## Solving C-2 from Sample Cm

$\mathrm{N}+\mathrm{Y}$ ends with S . If $\mathrm{N}=2$, then $\mathrm{S}=7$. If $\mathrm{N}=7$, then $\mathrm{S}=2$.
So...

|  | SUNNY |
| :---: | :---: |
|  | ADOONY |
|  | NAMTSY |
|  | SRMRNY |
|  | SAOMRASY |
| 9876543210 |  |
| D | Y |

$N$ is one of $(2,7)$. $A$ is one of $(3,7)$.

## Solving C-2 from Sample Cm

$\mathrm{N}+\mathrm{Y}$ ends with S . If $\mathrm{N}=2$, then $\mathrm{S}=7$. If $\mathrm{N}=7$, then $\mathrm{S}=2$.
Either way, 7 is in use, so A can only be 3 . Record that.

| SUNNY |
| :--- |
| $\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$ |
| NAMTSY |
| SRMRNY |
| SAOMRASY |
| 9876543210 |
| D Y A |

$N$ is one of $(2,7)$. $S$ is one of $(2,7)$.

## Solving C-2 from Sample Cm

$\mathrm{N}+\mathrm{Y}$ ends with S . If $\mathrm{N}=2$, then $\mathrm{S}=7$. If $\mathrm{N}=7$, then $\mathrm{S}=2$.
Either way, 7 is in use, so A can only be 3. Record that.
We also know $\mathrm{S}>\mathrm{N}$, so $\mathrm{S}=7, \mathrm{~N}=2$. Record those.

| SUNNY |  |
| :---: | :---: |
| $X$ DAY |  |
| ADOONY |  |
| NAMTSY |  |
| SRMRNY |  |
| SAOMRASY |  |
| 9876543210 |  |
| D S Y AN | (2 wds) |

## Solving C-2 from Sample Cm

SUNNY ends in 225. We can calculate some digits.
$Y * 225=1125$.
A * $225=675$.
D * $225=2025$.

| SUNNY |  |
| :---: | :---: |
| $\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$ |  |
| $\frac{\text { SAMTSY }}{\text { SARNY }}$ |  |
| 9876543210 |  |
| D S Y AN $\quad(2 \mathrm{wds})$ |  |

## Solving C-2 from Sample Cm

SUNNY ends in 225. We can calculate some digits.
$Y^{*} 225=1125 . \quad O N Y=125 . \quad O=1$.
$A * 225=675 . \quad T S Y=675 . \quad T=6$.
D*225 = 2025. RNY=025. R=0. Record O, T, R.
SUNNY
$\frac{\mathrm{x} \mathrm{DAY}}{\text { ADOONY }}$
NAMTSY
SRMRNY
SAOMRASY
9876543210
D STY ANOR (2 wds $)$

## Solving C-2 from Sample Cm

We are still missing $U$ and $M$. $U$ is only in SUNNY. $M$ is in two of the partial products and the final sum.

| SUNNY |  |
| :---: | :---: |
| $\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$ |  |
| NAMTSY |  |
| $\frac{\text { SRMRNY }}{\text { SAOMRASY }}$ |  |
| 9876543210 |  |
| D STY ANOR (2 wds) |  |

## Solving C-2 from Sample Cm

We are still missing U and M . U is only in SUNNY. M is in two of the partial products and the final sum.
We can find U by using the first partial product (all other letters known).
SUNNY
$\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$
NAMTSY
$\frac{\text { SRMRNY }}{\text { SAOMRASY }}$
9876543210
D STY ANOR (2 wds)

## Solving C-2 from Sample Cm

We are still missing U and M . U is only in SUNNY. M is in two of the partial products and the final sum.
We can find U by using the first partial product (all other letters known).
5 * SUNNY $=$ 391125. So SUNNY $=78225$. Record U=8.

| SUNNY |  |
| :---: | :---: |
| $\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$ |  |
| NAMTSY |  |
| $\frac{\text { SRMRNY }}{\text { SAOMRASY }}$ |  |
| 9876543210 |  |
| DUSTY ANOR $\quad(2 \mathrm{wds})$ |  |

## Solving C-2 from Sample Cm

We can calculate M , but 4 is the only one digit left, so $\mathrm{M}=4$.

| SUNNY |  |
| :---: | :---: |
| $\frac{\mathrm{X} \mathrm{DAY}}{\text { ADOONY }}$ |  |
| NAMTSY |  |
| $\frac{\text { SRMRNY }}{\text { SAOMRASY }}$ |  |
| 9876543210 |  |
| DUSTYMANOR $\quad(2 \mathrm{wds})$ |  |

## Solving C-2 from Sample Cm

All done! And the letters ordered 9-0 form two words.

Record the solution so you could later submit it for credit. C-2 DUSTYMANOR

```
            SUNNY
            x DAY
        ADOONY
        NAMTSY
    SRMRNY
    SAOMRASY
    9876543210
    DUSTYMANOR (2 wds)
```

## Thank you. Try another. Try the ACA!

The American Cryptogram Association (ACA) is a non-profit organization dedicated to promoting the hobby and art of cryptanalysis - learning to break ciphers. And we write ciphers, too. Our Sample Issue and all its solution tutorials are available on our website:
www.cryptogram.org/resource-area/sample-issue-cryptogram/
